

Specpure[®] Analytical Standards

Specpure[®] is the registered tradename for Alfa Aesar's comprehensive offering of Spectrochemical Analytical Standard Solutions.

Specpure[®] standards are unsurpassed in accuracy, purity and quality. Each product is guaranteed for one year from ship date. Alfa Aesar's atomic absorption standards solutions are accurate to $\pm 1.0\%$ and the Plasma solutions to $\pm 0.3\%$.

Specpure[®] Atomic Absorption Standards

These solutions are intended for use with either flame or furnace absorption spectroscopy. AA is the most frequently used instrumental technique for elemental analysis. Alfa Aesar offers **70 single-element** aqueous solutions at 1,000 $\mu\text{g/ml}$ in both 100ml and 500ml sizes.

Specpure[®] Plasma Standards

These solutions are intended ICP, DCP or MS-ICP. These techniques are capable of determining the concentrations of many elements quickly, either simultaneously or sequentially.

Alfa Aesar's high purity starting materials, years of manufacturing experience and ISO certified quality systems ensure a dependable analytical product.

Features of Specpure[®] Analytical Standards

- A NIST-traceable Certificate of Analysis is included with each standard solution.
- Expiration date stickers are included with each standard solution.
- Guaranteed for one year from date of shipment.
- Certified accuracy of ± 1.0 for atomic absorption standards and $\pm 0.3\%$ for plasma solutions from the stated concentration.

Further details and prices are available in the main Alfa Aesar Catalogue or via the website (www.alfa-chemcat.com).
